Main Wall Height	9'

Plan Description

This is a traditional style garage plan built on a slab foundation. The floor plan has ample room for 2 cars or would work as a stand-alone workshop. A person door is located on the side for easy access. The Ambrose has an 8/12 roof pitch to allow for attic space above for more storage. The right side of the garage has a 6 foot overhang to give anything/anyone shelter from the elements. The garage space is 26' wide but the overall including the covered patio area is 30'. This is the ultimate garage/workshop/storage building.
