**Plan Description**

This modern mountain style home is 2214 square feet of pure luxury. Not only is the curb appeal a stunning addition to this home, but the interior provides an aspect of luxury that makes you feel like a celebrity. After walking in through either the two-car garage or covered deck, you can prepare to be in awe. The garage is connected to a mudroom, complete with a catch all, as well as a bench and lockers for all things coats and shoes. While walking down to enter the hallway, you can find a large laundry room on the right, and the master bedroom straight ahead. The master has its own covered deck at the rear, as well as a spacious walk-in closet and large bathroom. The bathroom is finished with a double vanity, large soaking tub, and separate toilet and shower areas. Walking outside of the master to the right is a beautiful breezeway that provides breathtaking views. This enters into a large open space for an entryway, great room, kitchen, and dining room. All around the perimeter of the rooms has access to the covered deck outside, as well as access down to the backyard. The kitchen has a large walk-in pantry and island bar, while the great room has a built-in fireplace. This home has an optional unfinished basement with stairs near the master bedroom, which provides an additional 1806 square feet, 3 additional bedrooms, 2 additional bathrooms, and an extra family room.
